## Dr. Stefan Yoshi Buhmann

IRTG CoCo 2079, University of Freiburg

### **“How not to get caught cheating: Academic Misconduct versus Good Scientific Practice”**

Recent scandals involving Academic Misconduct have had repercussions far beyond the scientific community and into high-ranking politics. In order to help avoid such caveats, we will reflect on the standards of Good Scientific Practice as recently set out by the German Research Foundation and further specified by the Conference of Physics Departments. This will involve all aspects along the path leading to a well-founded publication or thesis, from finding original results all the way to communicating them to our peers.

**Tuesday, December 12, 2017, 6:00 p.m., HS II,  
Physics high rise, Hermann-Herder-Str. 3**
